VRUTIK ADANI

GTM SYSTEMS & AI ENGINEER | REVOPS ENGINEERING

Revenue Systems · AI Agents · CRM Architecture · GTM Automation

(909) 312-0019 | vrutik@carrermail.com | linkedin.com/in/vrutikadani | github.com/vrutikadani

California, USA · Open to relocate

SUMMARY

GTM Systems & AI Engineer with 4+ years across product, data, business systems, and revenue operations. Builds and operates CRM architecture, account prioritization, lead routing, commission logic, and production AI applications. Owns systems end to end from problem definition and architecture through Python/API implementation, rollout, governance, and measurement, with earlier 0-to-1 product and enterprise delivery experience.

PROFESSIONAL EXPERIENCE

Geneo United (Lumenis US Facial Aesthetics) — Los Angeles, CA Sep 2024 – Present

GTM Systems & AI Engineering | Technical Product & Revenue Systems

Medical-aesthetics business serving roughly 3,100 provider accounts with a 30-person commercial organization. Joined in data and analytics, then expanded into GTM Systems & AI Engineering, leading the Geneo side of the HubSpot to Salesforce migration and broader ownership of revenue systems, AI workflows, commissions, and planning. Manages one direct report; led two interns.

- Shipped and operate an autonomous inbound AI sales agent using Python, Claude API, and HubSpot APIs; deterministic logic governs eligibility, segmentation, and routing while the LLM handles conversation and reply classification. Runs first-touch for all inbound demand, saving roughly 12 SDR hours a week; reviewed 50+ drafts/classifications before autonomy and monitor live misclassifications, bounces, opt-outs, and mishandled threads.
- Led the Geneo side of the HubSpot to Salesforce migration across Leads, Contacts, Accounts, and Opportunities, defining object relationships, field mappings, lifecycle/ownership rules, and UAT; resolved cutover issues affecting roughly 13,000 contacts.
- Rebuilt lifecycle, segmentation, and seller routing for roughly 8,600 new contacts and 3,800 MQLs a year, restoring MQL to SQL to Opportunity attribution, automating ICP classification, and translating AlignMix territories into postal-code and round-robin ownership.
- Designed signal-based account prioritization using Clay to orchestrate ZoomInfo enrichment, Common Room engagement, and Gong conversation data; scored accounts in Python against ICP fit and open pipeline, then wrote ranked seller queues to CRM.
- Developed an AR case-intake agent in Copilot Studio that classifies Finance emails, normalizes customer/order numbers in deterministic logic, links replies by thread, and writes auditable decisions to SharePoint; automated manual intake and follow up administration with a daily digest for independent Finance ownership.
- Built and deployed a HubSpot Breeze AI assistant for CRM and pipeline Q&A across Sales, Finance, and Marketing, reducing recurring information requests from hours to under 10 minutes and giving teams self-serve access to commercial data.
- Owned the commission system for roughly 30 sellers and leaders after a Finance leadership departure, integrating Salesforce and SAP inputs into an automated compensation model with centralized plan rules, monthly advances, quarterly true-ups, ramps, caps, and audit controls.
- Modeled the FY2027 AOP with the CFO: roughly $20M base case, $12.6M–$27.3M scenarios, quarterly phasing, seller-capacity assumptions, matching quota architecture, and roughly $2.9M in modeled commission cost.
- Analyzed 3,136 enrolled accounts and found 1,146 (36.5%) had never ordered consumables, while 1,990 active accounts generated roughly $1.2M in quarterly net sales. Sized a $2.0M+ activation opportunity, migrated the storefront to Shopify for account attribution, and shipped a prioritized Customer Enablement list.

PNC Financial Services Jan 2024 – Aug 2024

Product Manager Intern | Consumer Mobile & Business Systems (full-time)

- Supported migration of the Private Bank mobile experience into the PNC Retail app, including release readiness, test automation, and rollout of Daon biometric sign-in (Face ID and Touch ID).
- Created a SQL, Python, and Power BI KPI layer with LLM-assisted commentary, cutting reporting turnaround by 13%, and produced executive MoM/QoQ/YoY analysis explaining $100M+ movements in infrastructure P&L drivers.

Leap.club (Konflake Tech) Oct 2021 – Aug 2022

Associate Product Manager

- Owned the 0-to-1 launch of a professional-networking app from discovery to MVP in three months across 10 core features; shipped collaborative-filtering member discovery that raised connections by 15% and MRR by 10%.
- Ran onboarding, engagement, and retention experiments; a Python engagement model on 100K+ behavioral data points raised DAU by 18%, while a churn model cut monthly churn by 5%.
- Unified Google Analytics, MoEngage, and proprietary telemetry into a 20+ metric behavioral layer covering the member funnel, cutting recurring analysis from one week to two days.

GTM SYSTEMS & AI PROJECTS

- **GTM Decision Engine** | GitHub · Live Demo — Tracks champion movement and account context, determines when a signal is actionable, and generates evidence-backed seller briefs with provenance, routing, feedback, and evaluation.
- **Clay Account Prioritization** | GitHub — Scores accounts using ICP fit and migration/security signals, gates paid enrichment, maps likely buyers, and outputs ranked seller queues with evidence confidence and human QA.
- **Product Signal Router** | GitHub · Live Demo — Python pipeline that scores account-level product events with deterministic rules, separates signal strength from evidence confidence, applies suppression and cooldowns to prevent repeat alerts, and writes ranked CRM actions with account-day deduplication, seller feedback, and a replay harness for missed-signal audits.

ADDITIONAL EXPERIENCE

Arizona State University — *Graduate Teaching Assistant* Aug 2022 – May 2024

- Taught and mentored 150+ Information Technology students alongside the M.S. program.

Arizona State University — *Technology Consultant* May 2023 – Aug 2023

- Engineered a Python ETL pipeline between Canvas LMS and Salesforce, completed a five-year data audit at roughly 95% accuracy, and trained 20+ staff; ticket resolution time fell by roughly 60%.

Mastek Enterprise Solutions — *Functional Consultant Intern* Jan 2022 – Jun 2022

- Contributed to a $100K Oracle HCM Cloud implementation, migrating 50K+ employee records at 99.5% integrity and using SQL/Oracle BI for reporting and 15+ HR process optimizations.

Uplara Inc. — *Data Analyst Intern* Oct 2020 – Mar 2021

- Reviewed and QA'd 2.5M image records for a size-recommendation model; improvements lifted conversion by 10%.

SKILLS

GTM Systems & RevOps: Salesforce (Flows, validation rules, reports/dashboards), HubSpot (workflows, lifecycle, scoring/routing), Clay, Gong, ZoomInfo, Common Room, AlignMix, SAP, Shopify; CRM architecture, data governance, system integrations, workflow automation, account prioritization, lead routing, territory design, pipeline/forecasting, commissions, quota architecture

AI & Engineering: Python, SQL (CTEs, window functions, query optimization), REST APIs, webhooks, LLM APIs (Claude), Copilot Studio, Power Automate, MCP, n8n, Zapier; data modeling, data warehousing, ETL/data pipelines, AI agents, deterministic business logic, human-in-the-loop review, guardrails, evaluation, monitoring

Product & Analytics: 0-to-1 product development, technical product management, experimentation, executive communication, Excel financial modeling, Power BI, Tableau; A/B testing, KPI definition, UAT, release management

EDUCATION

Arizona State University May 2024
M.S., Information Technology (Information Systems Management) — GPA 4.00/4.00

University of Mumbai May 2022
B.E., Information Technology

AWARDS, PUBLICATION & CERTIFICATIONS

- Presidential Award, Lumenis — Operational Excellence (National Sales Meeting 2025)
- Product Hunt Golden Kitty Awards 2021 — Winner, Diversity & Inclusion Product of the Year (Leap.club)
- **Publication:** Co-author, "Fashion Intelligence," Taylor & Francis (2023)
- **Certifications:** Salesforce Certified Business Analyst · Tableau Desktop Specialist
